Quick Guide

Thank you

for choosing Tracker.com! In the following pages you will find key information about how to operate your Mobile Locator.

The Mobile Locator is preconfigured and equipped with a SIM card. It works only with the SIM card installed by Tracker.com. Any other use of the SIM card or swapping it out with another is not permitted.

(10) Accept an incoming call

(11) End/refuse a call

(12) Loudspeaker

(13) Microphone

(4)

(3)

(1)

(2)

First steps

1. Plug the supplied power adapter into the mini USB socket (4) and charge the battery until the battery display (6) is constantly lit.
2. Hold the Mobile Locator outdoors, turn the unit on and wait approximately 2 minutes until the GPS position has been determined (also see page 11).
3. Check the position in the Dashboard at (https://admin.tracker.com) and also configure the call buttons 1–4 (at least one number must be entered).
4. While in the Dashboard, make sure that sufficient call credits are available.

The Mobile Locator is now ready and fully functional.

Switching on/off (1 or symbol)

Switching on
Push the On/Off button for a short time. The battery display **(6)** lights up for a short time and the GSM display **(5)** begins to flash.

Switching off
Push the On/Off button for 3 seconds.

Volume control (2)

Set the desired audio level with the volume control. Pressing the Quiet button for at least 3 seconds turns the Mute function on or off.

Keypad lock (3)

In order to avoid unintentional calls, the keypad lock **(3)** should be activated; to do so, slide it into the proper position (locked).

Triggering the alarm with the SOS button **(8)** functions even if the keypad is locked.

SOS button (8), call buttons 1–4 (9)

Configuring the buttons with the desired numbers to call must be done ahead of time in the Dashboard (https://admin.tracker.com).

It is mandatory that the SOS button and/or call button #1 be configured with a number.

To initiate a call with the SOS button **(8)**, push the button for at least 5 seconds.

The SOS button **(8)** functions even if the keypad is locked.

If the 7x24 Help Line option is activated, the SOS button is programmed to contact the emergency desk of the euro help line. If the 7x24 Help Line option is not activated, the SOS button is configured identical to call button **(1)**.

The buttons can be reprogrammed at any time in the Dashboard (https://admin.tracker.com).

Placing a call

To call the preprogrammed number, even if the keyboard lock **(3)** is activated, press the SOS button **(8)** at least 5 seconds. The connection is automatically made.
To call one of the additional preprogrammed numbers on call buttons 1–4, once the keypad lock **(3)** is released, first press button 1–4 and afterwards press the Call button **(10)**.

Accepting an incoming call

To accept an incoming call, press the Call button **(10)**.

Ending a call, refusing a call

To end a call or refuse an incoming call, press the Call Complete button **(11)**.

GSM reception status display (5)

Flashes quickly
Connection with the GSM network and tracker.com is being established.
Flashes slowly
The unit is connected with the GSM network and tracker.com.

Battery display (6)

Flashes slowly
Charging in progress.
Constantly lit
Battery fully charged.
Flashes quickly, beeps every 30 seconds
Charging capacity at 5% - battery must be recharged as soon as possible.

Status display for GPS reception (7)

Flashes quickly
Search for satellites in progress.
Lights up constantly for 2 seconds
The GPS position is valid.
